

TRANSITIONING TO A CIRCULAR ECONOMY

Recycling and resource recovery are central to building a sustainable future for Australia. Returning to Sydney in 2024, the Australasian Waste and Recycling Expo (AWRE) serves as the national platform for professionals and suppliers to collaborate and transition towards a circular economy and sustainable future.

Immerse yourself in two electrifying days of live events curated to unveil cutting-edge concepts and limitless possibilities within the industry. As waste management takes the spotlight in today's landscape, AWRE stands as the ultimate gateway to connect with forward-thinking pioneers, forging new relationships that drive eco-friendly advancement.

Explore an exciting showcase of innovative products and sustainable solutions designed to collect, process, and recycle waste more intelligently. Critical focus areas include Sustainable Packaging, Software & Technology, Food & Organics, and more. Connect with an influential community of waste and recycling professionals, suppliers/service providers, government departments, public sector bodies, and special interest groups to drive change effectively within your specialist area.

Learn from renowned industry leaders in the free-to-attend Seminar Program focusing on the latest challenges, developments, strategies, and policies that are shaping Australasia's waste and recycling industry. Enjoy unparalleled networking opportunities to share best practices, form profitable partnerships, meet new customers, and catch up with your peers as the industry gathers, all under one roof!
